

# SHIPWRECKED

**Oh no! Your cruise ship has sank in the Caribbean and you are stranded on a small desert island!**

**There is a slight chance that a distress call was made by the ship's captain but you are the only survivors. A storm appears to be on the way, so everyone needs to work together quickly to survive on the island and make plans so that you are spotted by a rescue party. The tide has left a bunch of stuff from the ship on the beach that could help. However, the storm is closing in fast and due to the intensity of the waves you only have time to select eight items.**

**You have 15 minutes to select eight items from the list below.**

**To help your group reach a decision, go through the list scoring each item in order of how important you think they are from 0-10 (0 = not important / 10 = incredibly important). Remember that there are no right or wrong answers.**
